In March 2015, all roads lead to Torun!
Dear Athletes,
Dear Friends of Masters Athletics

In 2011 the Polish Masters Athletics, together with the Mayor of Torun has decided to bid for the rights to organising of the 10th European Masters Athletics Championships Indoor in 2015.

The EVAA Council, among four candidatures, the right to hosting of the European Championships, has been granted to the city of Torun in Poland.

Certainly the organization EMACI 2015 will be a big challenge for Poland. However I would like to assure you that organising IAAF Indoor in Sopot, March 2014, let gained Poland a lot of practical knowledge and experience, which will be used in March of 2015.

Poland has also a good experience from organising the 15th European Veterans Athletics Championships Stadia, hold in Poznan in 2006. I am convinced that gained experience will be very useful during organization the EMACI in 2015 in Poland.

Torun is more than 200 thousand inhabitants, located in the centre of Poland, is also well known for economic, scientific, cultural and sports. Torun is one of the oldest Polish cities, which in the Middle Ages has belonged to the “Hanseatic League”. In Torun in 1473 was born the famous Polish astronomer and mathematician - Nicolas Copernicus, founder of the “Heliocentric vision of the universe”. So far in the Old Town is located Copernicus home, where currently there is a museum.

On behalf of the Local Organizing Committee - EMACI 2015, I would like to welcome athletes and accompanying persons to visit this unique Gothic town. I believe that not only sport impressions will remain in your memories, but also the cultural richness and newly acquainted friendships, which will be continued at following sports meetings.

Yours,

Jerzy Krauze
Vice President
European Masters Athletics
